I am an Oracle PL/SQL developer with over 20 years of experience in system development using PL/SQL, Oracle Forms (from 6i to 12c), and Webtoolkit. The latter is hands-on, involving PL/SQL, HTML, JavaScript, and CSS. I implemented a version control system in PL/SQL and a package to generate PDF files.

Currently, I also work with the .NET Framework, C#, and API consumption (JSON) in agile environments and multidisciplinary teams using the Scrum methodology, with experience at B2W, Santander, CVC, and Crefisa.

I possess strong teamwork skills, a cooperative spirit, determination, and a commitment to deadlines.

Technical Skills

Oracle PL/SQL Development

Oracle PL/SQL | Oracle Forms | Oracle Reports | Webtoolkit | JavaScript | HTML | CSS

.NET Development

.NET Framework | C# | REST API | JSON | GIT | Jenkins | T-SQL

Professional Experience

Oracle Developer | .NET Developer
Crefisa - CBYK | São Paulo | 2021 – Present

- Developed financial systems using .NET Framework, .NET Core, Oracle PL/SQL, and T-SQL. Resolved integration issues in the Eguardian tool, eliminating failures and improving customer satisfaction, thereby preventing financial losses. Implemented seven additional bots, increasing the total to twelve bots under active management.
- Eguardian is a fraud prevention management solution.
- Most recently, I made improvements to the Autbank bot that enhanced performance and stability, and prevented the unnecessary generation of .txt files.

Oracle Developer | .NET Developer
Funcesp - Sinqia | São Paulo | 2020 – 2021

- Developed pension fund management systems using .NET Framework and Oracle PL/SQL.

Oracle Developer | .NET Developer
Santander / Caixa Federal - Atos | São Paulo | 2018 – 2020

- Developed pension fund management systems (KIPREV) using Oracle PL/SQL Forms 12c

Education

Bachelor of Computer Science
Unisanta | Bachelor's Degree | 1997 – 2000
